Are you a producer or a dealer of interesting materials that are still missing in our database? For this end, we apply, together with MateriO Paris, a selection procedure based on several criteria. For instance, we do not aim at a "complete" database, including all materials. It concerns innovative materials, which have a potential for numerous applications. Above all, they have to inspire. To be registered, the samples must be provided in five samples. The size of the samples is preferably A4, unless differently required by the material. It is also better to join information (in English and/or French), which explains why this material is so special. If they are approved, the samples are immediately also sent out to the other offices (Barcelona, Prague...). You will be informed about that.

The registration of your samples in the database is free!

*MateriO Belgium is the first independent information centre for innovative materials in Belgium, based on the concept of MateriO, founded in Paris in 2001. The MateriO Belgium office is located in Brussels and the showroom is in Designcenter De Winkelhaak in Antwerp.*

*MateriO offers a large, international selection of contemporary, innovative materials and semi finished products that will inspire you while developing products and arranging spaces. MateriO combines the needs of creative professionals – product developers, architects, designers - and of firms, industrialists, engineers and researchers.*

Take a look at our website [www.materio.be](http://www.materio.be) for the other possibilities.
